COMPACT, DUAL-FREQUENCY GNSS RECEIVER DELIVERS ROBUST RTK FUNCTIONALITY

HIGH PRECISION GNSS, COMPACT SIZE
The dual-frequency OEM615 offers future ready, precise positioning for space constrained applications. Backward compatible with NovAtel’s popular OEMV-1 form factor, the OEM615 provides the most efficient way to bring powerful Global Navigation Satellite System (GNSS) capable products to market quickly.

DESIGNED WITH PERFORMANCE AND THE FUTURE IN MIND
The OEM615 tracks all current and upcoming GNSS constellations and satellite signals including GPS, GLONASS, Galileo, BeiDou and QZSS. It features configurable channels to optimize satellite availability in any condition, no matter how challenging. The OEM615 is software upgradable to track future signals as they become available. Maximizing satellite availability and optimizing GNSS signal usage now, and in the future, ensures consistent, high performance GNSS positioning.

DESIGNED FOR FLEXIBILITY
The modular nature of NovAtel’s OEM6® firmware gives users the flexibility to configure the OEM615 for their unique application needs. The OEM615 is scalable to offer sub-metre to centimetre level positioning, and is field upgradable to all OEM6 family software options. Options include AdVance® RTK for centimetre level real-time positioning, ALIGN® for precise heading and relative positioning, GLIDE™ for decimetre level pass-to-pass accuracy and RAIM for increased GNSS pseudorange integrity.

CUSTOMIZATION WITH AN API
Application Programming Interface (API) functionality is available on the OEM615. Using a recommended compiler with the API library, an application can be developed in a standard C/C++ environment to run directly on the receiver platform, eliminating system hardware, reducing development time and resulting in a faster time to market.

BENEFITS
+ Proven NovAtel technology
+ Easy to integrate
+ Low power consumption
+ API reduces hardware requirements and system complexity

FEATURES
+ Increased satellite availability with GLONASS tracking
+ L1, L2, L2C, B1 and E1 signal tracking
+ GLIDE smoothing algorithm
+ RT-2®, ALIGN and RAIM firmware options
+ SPAN® INS functionality

## OEM615™

### PERFORMANCE

**Channel Configuration**
- 120 Channels

**Signal Tracking**
- GPS: L1, L2, L2C
- GLONASS: L1, L2, L2C
- BeiDou: B1
- Galileo: E1
- SBAS
- QZSS

**Horizontal Position Accuracy (RMS)**
- Single Point L1: 1.5 m (RMS)
- Single Point L1/L2: 1.2 m (RMS)
- L2C code: 5 cm (RMS)
- L2 carrier phase: 6 cm (RMS)

**Maximum Data Rate**
- 7 Mbps

**Time to First Fix**
- Cold start: < 50 s
- Hot start: < 35 s

**Signal Reacquisition**
- L1: < 0.5 s (typical)
- L2: < 1.0 s (typical)

**Time Accuracy**
- 20 ns RMS

**Velocity Accuracy**
- 0.03 m/s RMS

**Velocity Limit**
- 515 m/s

### PHYSICAL AND ELECTRICAL

**Dimensions**
- 46 x 71 x 11 mm

**Weight**
- < 24 g

**Power**
- Input voltage: +3.3 VDC ±5%
- Power Consumption
  - GPS L1/L2: < 1.0 W
  - GPS/GLONASS L1/L2: 1.1 W
  - all on: 1.2 W

**Antenna LNA Output Power**
- Output voltage: 5.0 VDC
- Maximum current: 100 mA

**Environmental**
- Temperature: Operating -40°C to +85°C
- Storage -55°C to +95°C
- Humidity: 95% non-condensing

**Vibration**
- Random MIL-STD 810G
- Sinusoidal IEC 60068-2-6
- Bump ISO 9022-31-06
- Shock MIL-STD-810G (40 g)

**Power Consumption**
- GPS: L1/L2: < 1.0 W
- GPS/GLONASS L1/L2: 1.1 W
- all on: 1.2 W

### FEATURES

- Field upgradeable software
- Multi-path mitigating technology
- Differential GPS positioning
- Differential correction support for RTCM 2.1, 2.3, 3.0, 3.1, CMR, CMR+ and RTCA
- Navigation output support for NMEA 0183 and detailed NovAtel ASCII and binary logs
- Auxiliary strobe signals, including a configurable output for time synchronization and mark inputs
- Outputs to drive external LEDs
- GLIDE smoothing algorithm

### NOVATEL CONNECT™

NovAtel Connect is an intuitive configuration and visualization tool suite allowing comprehensive control of the OEM615 product.

- Easy to use wizards for positioning mode configuration and raw data collection
- Detailed GUI for comprehensive status information
- Plan view and playback files allow to monitor positioning and configuration history
- Remotely control and monitor the OEM615 over the internet
- Windows XP and Windows 7 platforms

### FIRMWARE OPTIONS

<table>
<thead>
<tr>
<th>Options</th>

</tbody>
</table>

### OPTIONAL ACCESSORIES

- GPS-700 series antennas
- ANT series antennas
- RF Cables—5 and 10 m lengths
- OEM6 Development Kit

### HIGH VIBRATION HARDWARE

The OEM615 is available as a High Vibration TCXO hardware variant, the OEM615V. This is compliant with MIL-STD 810G (Category 24, 20 g RMS).

---

1. Typical values. Performance specifications subject to GPS system characteristics, US DOD operational degradation, ionospheric and tropospheric conditions, satellite geometry, baseline length, multipath effects and the presence of intentional or unintentional interference sources.
2. Tracks up to 60 L1/L2 satellites.
3. Designed for BeiDou Phase 3 B1 compatibility.
4. GPS only.
5. L2 P for GLONASS.
6. L2 C/A for GLONASS.
7. 50 Hz while tracking up to 20 satellites.
8. Typical value. No almanac or ephemerides and no approximate position or time.
9. Typical value. Almanac and recent ephemerides saved and approximate position and time entered.
10. Time accuracy does not include biases due to RF or antenna delay.
11. Export licensing restricts operation to a maximum of 515 metres per second.
12. Typical power consumption values.
13. User application software required.
